

PRESS RELEASE

Optoma Launches a re-designed and enhanced award winning Data Projector

The Optoma EP770 Delivers Bright Vivid Images for Office and Home Applications

FOR IMMEDIATE RELEASE

PR00060

Watford (January 02, 2006) – Optoma, one of the leading manufacturers of digital projection and display devices, introduces the EP770 projector. The lightweight EP770 follows in the footsteps of the award winning EP739H, now re-designed and enhanced, exceptionally bright 3000 lumens. Native XGA the EP770 delivers high performance and picture quality in an all in one multimedia projector.

The Optoma EP770 features the latest Texas Instruments XGA DMD chipset to deliver vivid digital images. Higher lumens (3000 lumens) and deep colour saturation (2000:1 contrast ratio) and a five segment colour wheel, the EP770 in its small and compact design, produces vibrant and more realistic images than ever before.

Optoma's EP770 includes extensive connectivity options, including DVI with HDCP, VGA (SCART & Component enabled) as well as audio and video inputs. The projector also features an integral 2-watt speaker, making the EP770 a true multimedia projector for office or home entertainment use.

The EP770 has a comprehensive RS232 command set for traditional AV installations. Additional option of a short throw lens allows larger images from a shorter distance to accommodate a greater number of different installation environments making the EP770 a fantastic projector for a wide range of different applications.
